

The app for controlling your Roberts internet radio

ConnectR from Roberts Radio is the remote control app for Roberts internet radios and media streamers for your iPhone or iPod touch. The app allows selection of internet radio stations, selection and control of media for UPnP/DLNA music streaming from a local computer, server or NAS device, as well as control of DAB and FM radio and other functions (where these functions are present on the radio). The Now Playing screen provides radio station or media information with direct control of the radio volume. The app also allows control of multiple radios.

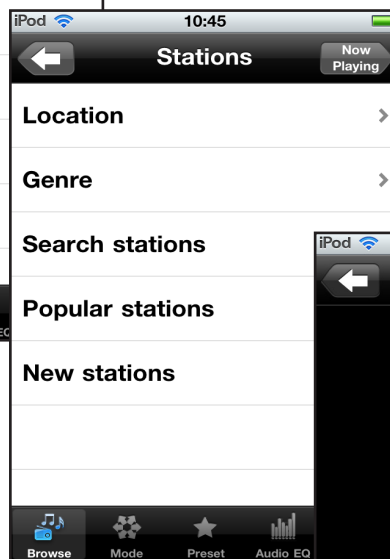

Changing mode

To view the available operating modes tap the **Mode** button.

Browsing radio stations or music

To browse radio stations or music content tap the **Browse** button and scroll the lists as needed.

Selecting items

The choices when browsing are dynamic according to the mode, and are the same as those on the radio.

NetRemote PIN Setup

On your radio: Go to *System settings > Network > NetRemote PIN Setup* to set the PIN for remote control access (default radio PIN = 1234).

Keep network connected

Go to *System settings > Network > Keep network connected* to optionally allow your radio to retain its network connection in standby mode, or in DAB/FM mode (where applicable). This will allow you to bring the radio out of standby mode using the app.

Note: Keeping the network connection active will slightly increase the radio's power consumption. The radio must be mains powered in order to use this feature. The radio will still turn off fully when put into standby mode while running on batteries.

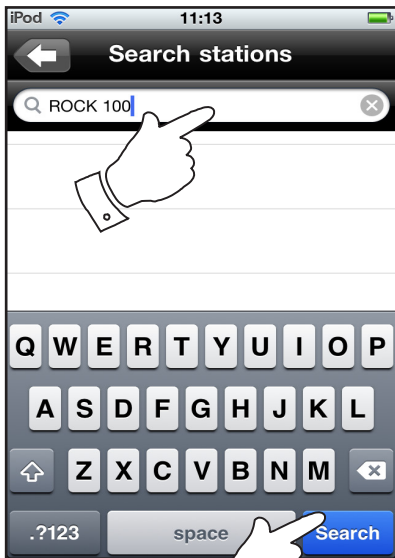

While the radio is playing you can control volume remotely.

ROBERTS

Enjoy Listening

Different screens allow rapid selection of content for listening, access to the different operating modes of your radio, the radio station presets, audio EQ functions and other settings.

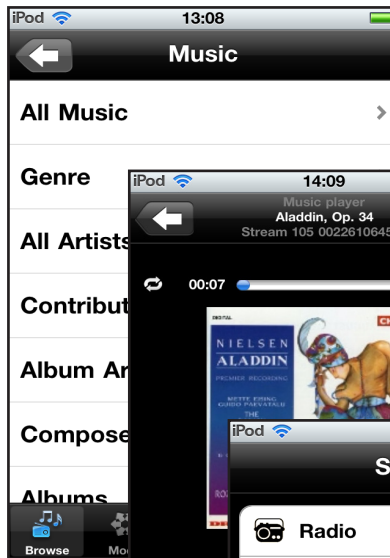

Text entry

Tap the search bar - a keypad will pop up. Enter the search text and then tap search.

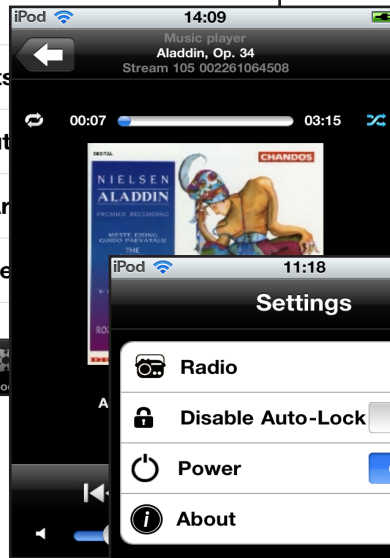

Select radio settings

Tap the *Settings* button to access the options screen. Tap the setting to view or change.

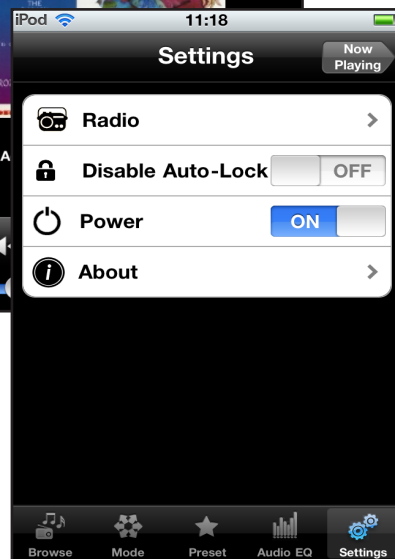

Browse music player

To browse content tap the *Browse* button. Choose by Album, Artist, Song, etc.

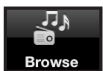

Now Playing screen

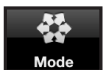

Select tracks, change radio volume, control repeat and shuffle options.

- > Select desired radio
- > Disable iPod sleep
- > Power radio On/Off
- > Information

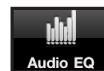

Browse - Select radio stations, music player content and other mode specific content.

Mode - The display will adapt to the operating modes supported by your radio.

Presets - Presets are used in radio mode only. Presets must have been set using the radios controls before use from within the app.

Audio EQ - Note that not all radios support the EQ function (the Stream 105 radio does not have the EQ feature).

Settings - Choose radios, disable iPod sleep, radio power on/off.

Initially provided to support the Roberts Stream 105 radio, it is anticipated that other Roberts network connected radios will also be supported by the ConnectR app in the future. Note that not all radios are capable of being supported. Please visit www.robertsradio.co.uk for an up to date list of supported radios and for further information on Roberts products.
